

PERSONAL COMMITMENT · PROFESSIONAL COMMITMENT

Over the course of **three generations**, our family business has acquired a complete command of new technologies and practices in the construction sector which is highly valued by our public and private clients alike. They know they can trust us to execute all kinds of civil engineering projects, such as **water and agricultural infrastructures, environmental works, roads and land development, and the construction and rehabilitation of buildings.**

Our mission is to provide an **honest** service, offering complete **commitment** to our clients, the **security** of our **financial stability**, and execution of works using **our own resources**, which include a cutting-edge fleet of machinery that is regularly updated and a multidisciplinary team of professionals who combine a long history of service in our company with a high level of specialisation in the execution of works.

Blas Presa

Encompassing a wide range of professions, our staff regularly update their skills and have spent an average of more than 16 years with our company, endowing us with a **team that identifies with our business philosophy** and is oriented towards achieving excellence in the work executed.

We have a large and cutting-edge fleet of machinery consisting of **all kinds of vehicles** for the transport of machinery and materials by road, as well as a **wide range of heavy machinery** for public works.

This, coupled with a **stable, multidisciplinary team**, allows us to carry out nearly all of the work specified in our contracts ourselves, avoiding the need to sub-contract a large proportion it.
